Filtering the best 3 (or less) performances averaging the performance of these best (aged PRPs)

Substitute from National Ranking List if no participation at the BIG5 this PRP is taken - leveled to this Nations general performance level within the BIG5
 Example: GERmany shows good performance in the BIG5, so GER pilots get a high level for their substitution if only flying at home.

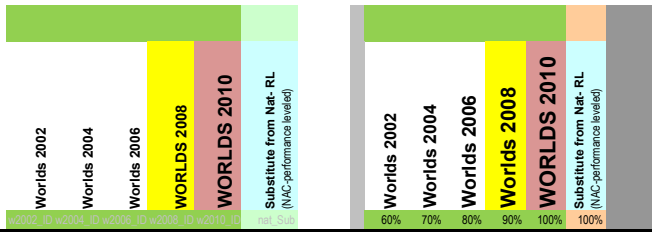

in case of a NAC-Substitution, a factor of 50% is applied, so that pilots competing only within their NAC (ranking), cannot easily lead others that compete in the BIG5 events
 Consistency is gaged and factored:
 For one single result, you get 80%, for two results 90%, and for three, you get 100%

This gives the intermediate points within the calculation which are scaled to 1.000 points for the winner (as common in the task scoring formula)

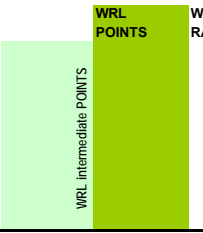

WRL RANK Pilots Name Identifier (unique) First Name Last Name Legend: name is grey if only a NAT result NAC

 Name
 WORLD RANKING LIST of Hot Air Ballooning - Oct 2010

all others are scaled relative to their performance: one with 20% less intermediate points than the winner gets 800 points -- for easy performance comparison.
